JAN 2009 VOL.3 #3

Bring on the Next Wave!

As we said last year, the Side X Side market is constantly changing. Last year, our 2008 Model Buyer's Guide covered only nine manufacturers. This year, we are bringing 19 manufacturers and over 50 different vehicles to you. 2008 has been a year of tremendous growth for the Side X Side market and with the pace that it's on, we can only expect the same for 2009 and beyond.

To make it easier to compare the huge number of vehicles and organize this ever-growing field, we have created five different categories. Our classes are defined as: Sport, Sport Utility, Utility, Multi-Passenger, and Youth. Pull up a chair, get comfortable, and enjoy the next few pages. Hopefully, we won't spend too much of your money for you. Stay tuned in upcoming issues, as we will put each of these vehicles to the test and run them head-to-head against each other to show you what they are made of.

Vehicle Buyer's Guide

CLUB CAR XRT 950 EX

The Club Car XRT950 EX brings full-size features to a mid-size utility vehicle. Packed full of superior features and technology, this vehicle sets a high bar for other utility vehicles to match. An incredible value for the money, this model comes standard with a full Bestop™ enclosure system, straight from the manufacturers of enclosures for the JEEP® brand. The sealed system protects users from all elements – rain, sleet or snow. Other bonuses include a rear receiver hitch, sealed CVT, and front tube bumper.
