COMPLETE YOUR PORTFOLIO WITH

AUTOMATIC ALL-WHEEL DRIVE UTVS

Keep your industrial and construction customers satisfied and in-house by offering all the resources they need to improve performance and cut costs. That includes powerful utility vehicles that work like trucks, but cost less to insure, operate and maintain.

The Carryall® 1500 and 1700 utility vehicles fit that bill. The only all-wheel drive utility vehicles in the rental market, they are durable, versatile and easy to maintain. These rugged, reliable vehicles are ready-to-ship. They feature:

- The IntelliTrak™ all-wheel drive system senses the ground it's on and combines all drive systems in one. It can go from one-, two-, three- or four-wheel drive to match driving conditions. Users love it because it is an automatic 4x4 with no levers to pull, buttons to push or driver training needed. You'll love it because there are fewer moving parts for renters to damage.
- A four-link semi-independent rear suspension system that combines independent system performance with solid-axle strength. The vehicles maintain their axle ground clearance even when fully loaded on rough terrain.
- The industry's only rust-proof corrosion-resistant aluminum frame for long life and optimum resale value. Other UTVs are built on steel frames that rust.
- Clean air intake through the chassis channel tube above the headlights that reduce maintenance, extend engine life and prevent clogging and choking.
- A new braking system that improves safety and reduces maintenance. It features dual-piston front brakes, more robust rotors and brake pads plus a larger bore in the master cylinder. There's also an independent park brake with a mechanical caliper, a dedicated rotor off the transmission, and sectional booting brake cables that can be easily replaced.
- A two-year limited warranty and a wide range of commercial-grade accessories.

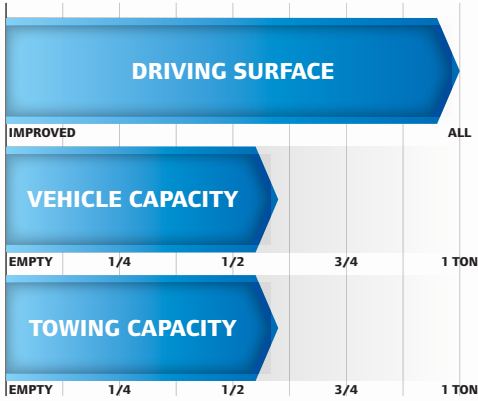

SmartEquip™

TWO-PASSENGER

CARRYALL® 1500

WITH INTELLITRAK™ AUTOMATIC ALL-WHEEL DRIVE

POWERTRAIN	Kubota 20 hp-rated (15.0 kW) diesel engine Kawasaki 20.1 hp-rated (15.0 kW) gasoline engine
