SOLUTIONS

MASTER YOUR CAMPUS

Facilities, grounds and fleet managers at schools and universities are tasked with moving quickly from job to job, boosting sustainability and safety, and cutting total cost of fleet ownership.

That calls for versatile, long-lasting vehicles, task-multiplying accessories and a strategic transportation plan that lets you do more with less.

CLUB CAR® DELIVERS ALL THAT AND MORE.

Our portfolio includes two- or four-wheel drive electric, gas or diesel Carryall® utility vehicles that work like pickup trucks; comfortable and safe people movers; and rugged street-legal Carryall LSVs (low-speed vehicles) that get up to 30 miles per charge.

As the world's largest manufacturer of small four-wheel electric vehicles, including UTVs, golf cars and LSVs, we manufacture electric cars that deliver the power of gas, yet eliminate emissions. You've got to drive them to believe them.

If you are a state school, you can purchase our vehicles through U.S. Communities, the nation's leading government cooperative purchasing program. This cuts red tape, speeds delivery and guarantees best pricing.

LEVERAGE OUR
UNMATCHED
TRANSPORTATION EXPERTISE

Our specially trained transportation experts, with years of education experience, will help you develop a comprehensive transportation plan. Together, you will select the right mix of vehicles and accessories to cut your costs, boost your sustainability and stabilize your monthly transportation budget.

There's no charge for the service, whether the plan is within your department or across multiple campuses.

Club Car also operates the most active custom solutions department in the industry where we make vehicles for specific applications.

SLASH
OWNERSHIP COST

- Boost sustainability with reliable, zero-emissions electric utility, transport and low speed vehicles with heavy-duty controllers and motors that deliver the power of gasoline vehicles. Our gasoline vehicles also deliver best-in-class fuel efficiency and power.
- Cut downtime with our smart on-board chargers with retractable cord reels and EFI gasoline engines that require less maintenance than others.
- Stop rust and extend the life of your fleet with our exclusive rustproof, corrosion-resistant, aircraft-grade aluminum frame, chassis and bed box.
- Experience fit-to-task versatility with the largest selection of commercial accessories in the industry, including our VersAttach™ track-based attachment system that protects gear, frees floor space and reduces round trips. There's nothing else like it.
- Protect your investment with a 4-year battery, 3-year/3,000-hour powertrain, 2-year bumper-to-bumper limited warranty on most models. That's best in class.
- Widest range of vehicles with electric, gasoline and diesel powertrains.

Find your local Authorized Club Car Dealer now, and take control of your fleet.

FIT-TO-TASK
VERSATILITY

Need a vehicle for a specific purpose? Let our Custom Solutions Department solve your problem. We'll design a vehicle for your application, have it reviewed for safety and regulatory issues and prepare a quote for your consideration. Customized vehicles carry the same warranty as other Club Car vehicles. Contact your Authorized Club Car dealer for more information.
