TRANSPORTATION
 SOLUTIONS

WHY CLUB CAR?

- Our reliable, zero-emissions electric utility, transport and low speed vehicles feature heavy-duty controllers and motors that deliver the power of gasoline vehicles while slashing energy usage.
- Most of our gasoline vehicles are powered by an EFI engine with overhead cams that requires far less fuel and maintenance than competitive models.
- Our exclusive rustproof, corrosion-resistant, aircraft-grade aluminum frame extends vehicle life and improves resale value.
- Our industry-leading 4-year battery, 3-year/3,000-hour powertrain, 2-year bumper-to-bumper limited warranty on most models protects your investment.
- Our safety standards not only meet but exceed industry requirements.

Club Car

**SIMPLIFY PURCHASING
AND BOOST
SUSTAINABILITY & PERFORMANCE.**

At Club Car, we know that shopping for government vehicles can waste days of your valuable time. So we offer a simpler solution.

We are the world's largest manufacturer of small four-wheel electric vehicles, and the leader in the U.S. utility vehicle market. As a result, we have forged the infrastructure to cut the government purchasing process down to size.

For starters, you'll have access to the most extensive portfolio in the industry. We've got utility, transport or street-legal low speed vehicles to maintain your facilities, grounds or turf. Our vehicles will also move crews around government sites or military bases. They will support your utilities and parks and recreation departments, secure your site, monitor parking and simplify other tasks.

You'll work with a specially trained transportation expert who understands the importance of sustainability, safety and liability, durability and total cost of ownership.

Our Carryall® utility vehicles are available with electric, gas or diesel powertrains and in two-wheel drive and automatic all-wheel drive models with ROPS (roll over protective structure). Our electric vehicle feature programmable controllers and smart on-board chargers with cord reels, giving you control of vehicle performance and the ability to charge virtually anywhere increasing worker productivity.

We've even simplified purchasing through our contract with U.S. Communities, the nation's leading government cooperative purchasing program. Join for free and you'll cut red tape, speed delivery of your vehicles and enjoy guaranteed best pricing.

FIT-TO-TASK SOLUTIONS We also offer the industry's largest selection of commercial-grade accessories, including the VersAttach™ bed-based attachment system. Its racks and holders carry gear outside the bed, free bed space and limit round trips. And our custom solutions department has built unique vehicles for the U.S. Military, Camp David and many city and state applications.

Visit clubcardealer.com to arrange a free demo with your local Authorized Club Car Dealer.

**FIT-TO-TASK
VERSATILITY**

Need a vehicle for a specific purpose? Let our Custom Solutions Department solve your problem. We'll design a vehicle for your application, have it reviewed for safety and regulatory issues and prepare a quote for your consideration. Customized vehicles carry the same warranty as other Club Car vehicles. Contact your Authorized Club Car dealer for more information.
